ACCESSORY

Leader of Ergo industry in Taiwan

Since 1962

Living and working healthier by constant moving, changing position! It has long been on technological extensive research testified the importance of being ergonomic, variety of ergonomic products therefore brought to the markets. Competitions keeps people including children spending longer time with their desk & chair, non-adjustable furniture hence become life threaten to people because long sitting do kills.

TCT has been studying human body development especially children. Successively developing desk & chair under the theme of ergonomic to ensure the user of TCT product stay away from illnesses results from using improper furniture that are supposed to be avoidable.

Health

Cope with children is growing rapidly, TCT ISO-norms children ergo furniture adjustable to different heights, angles for various purposes of reading, drawing, painting, and writing. Providing the best working environments for all users in different ages, heights.

Safety

Top priority! Being safe for user is more important than anything else. Without safety, all the designs, functions don't exist. 100% inspection! TCT is the goalkeeper for users' carefree from using TCT product.

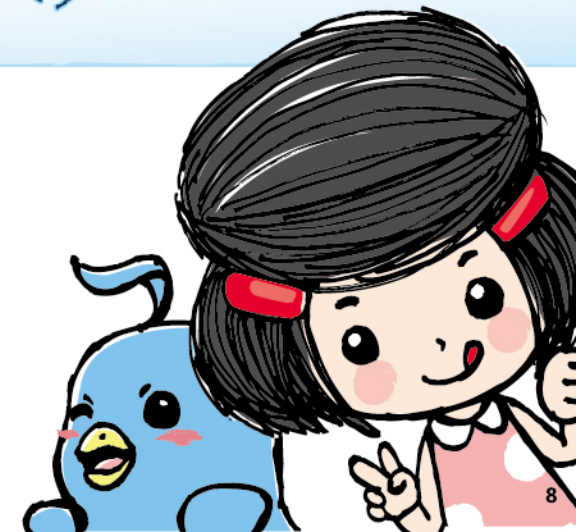

Environmental

Powder coating is 70% less pollution for water, 40% for air than traditional painting. Besides, TCT adopted recycled PET, Non-toxic glue contains 0 heavy metal. All products from TCT is 100% green which is TCT's commitment to our users. As a living creature on earth we have responsibility for saving our planet.

Happy

Smile on children's face drives TCT to move forward. Colorful curved lines with unlimited imaginations accompany kids, making their childhood unforgettable ones.

A desk helps to take care our lovely kids.

Forming a habit of having right gesture. Fixed height is just not right but heights making user feel comfortable. Germany made STABILUS gas lift for up and down. 0~50 degree tilt-able desktop for different kinds of jobs enable user working easily without side effect from long sitting & wrong posture like spinal ache, sour shoulder and painful arms

DESK

Height and Angle

Different size people wear different sizes clothing same as furniture, one size fits all is so unnatural and inhuman. Adjustable furniture is just like people do like to have their own clothes. Size matters! Being comfortable is everything.

Homework / typing

Demanded angle : 0°
Demanded height : 53-59cm

Most people used to do homework and typing on a flat top. Little angle helps! More efficiency and less stress. Gazing at objects for hours

Writing

Demanded angle : 15°
Demanded height : 59cm

Immature muscle of children's wrist, arm. Writing gesture at 90°~120° makes it easier. Children hence raise a habit of holding pen correctly.

Reading

Demanded angle : 30°-60°
Demanded height : 68cm

Keep books raised 30°~60° for reading to avoid eyes fatigue, nearsightedness and any pathological changes of eyes

Drawing

Demanded angle : 40°-70°
Demanded height : Body Height

Drawing most of the time needs bigger angle 40°~50°, standing is suggested than sitting drawing. The G series kids' desk has all angles and heights for the needs.
